**Effective June 1, 2006**, you must calculate the New York State portion of your sales and use tax using a “cents-per-gallon” method on sales and uses of qualified motor fuel and diesel motor fuel. As a result of this change, you must report the New York State portion of the sales tax separately from the local taxes. **Effective July 1, 2006**, certain localities also enacted a “cents-per-gallon” method for computing sales tax on qualified fuel. If you made sales of qualified fuel in these localities (listed in Step 4 of this section), you must separately report the local taxes due according to the dates of the sales. Please see the instructions to this schedule for more information, including a definition of qualified fuel and detailed instructions on computing the tax due.
