

Local Sales and Use Tax Rates on Qualified Motor Fuel, Highway Diesel Motor Fuel, and B20 Biodiesel

Effective June 1, 2022

Generally, the New York State sales and use tax rate on motor fuel and highway diesel motor fuel is a cents-per-gallon rate. Effective **June 1, 2022**, and continuing through December 31, 2022, New York State sales and use taxes on motor fuel and highway diesel motor fuel are suspended. The additional state sales tax imposed in the Metropolitan Commuter Transportation District (MCTD) is also suspended. For more information, see Important Notice N-22-1, *Suspension of Certain Taxes on Motor Fuel and Diesel Motor Fuel Beginning June 1, 2022*.

The Tax Law authorizes counties and cities to change their percentage rate sales tax to a cents-per-gallon method, or stay with a percentage rate method.

Effective **June 1, 2022**, several localities have elected to change their method of computing **local sales tax** on motor fuel, highway diesel motor fuel, and B20 biodiesel sold as qualified

fuel. In many of these localities, the local sales tax will no longer be computed using a percentage rate method and will instead be computed on a cents-per-gallon basis. In certain cities identified below with an asterisk, the local tax must be computed using both methods.

Example: *You sell five gallons of motor fuel in the city of Rome. The taxable receipt of a gallon of gas is \$4.00, for a total of \$20.00. Apply the cents-per-gallon rate in Part 1 to the five gallons sold and the percentage rate in Part 2 to the total taxable receipt of \$20.00.*

Taxable receipt	\$20.00
Cents-per-gallon sales tax.....	.50
Percentage rate sales tax.....	<u>.30</u>
Total	\$20.80

Any items changed from the previous version appear in **boldface italics**.

See footnotes on page 2.

Part 2: Local percentage rates

The localities listed below impose their local sales tax on qualified fuel using the percentage rate method.

To determine the local sales tax due, multiply the taxable receipt amount by the appropriate rate in the chart below.

B20 biodiesel

In localities that continue to use the percentage rate method, 80% of the receipt from the sale of B20 biodiesel sold as qualified fuel is subject to the local tax. In the localities listed below, multiply 80% of the taxable receipt by the appropriate rate in the chart to compute the local tax due.

Jurisdictions are listed in county order

Jurisdiction	Rate %
Albany County	4
Olean (city)^{3*}	1½
Salamanca (city)^{3*}	1½
Cayuga County (outside the following)	4
Auburn (city)	4
